

Dear Hiring Manager,

I hope this message finds you well.

I am writing to express my sincere admiration for **Perspective's** remarkable track record and to explore potential opportunities to contribute my skills and expertise as a front-end developer.

Brief About Me And My Career

With over **8 years of experience in the startup ecosystem** as a self-taught developer, I have specialized in architecting and building applications for both B2B and B2C startups. Throughout my career, I have played a pivotal role in scaling products, delivering exceptional customer satisfaction, and driving significant business growth.

Current Career

Currently, I am employed at Coboworx, a robotics company, where I have been actively involved in front-end development for the past **11 months**. While my time at Coboworx has been enriching, the company is, unfortunately, facing funding challenges and is on the brink of closing down. As a result, I am actively seeking new and exciting opportunities to continue my professional growth and thus contribute to **Perspective's** growth.

My Interest in Perspective

Amidst the uncertainty, I discovered **Perspective's**, a standout organization with a stellar reputation in the industry. As I researched and delved deeper into the work that **Perspective's** undertakes, I was impressed by the cutting-edge solutions like *Hassle-free editing, Mobile First, Customer insights, the culture*, and the impact the company has made in the market. It became evident that **Perspective's** aligns perfectly with my aspirations and values and provides the ideal platform for me to excel and grow both professionally

I must admit that I am currently experiencing a degree of unfocus and confusion due to the challenging circumstances at Coboworx. However, I am confident that with the right team and environment, I can overcome these obstacles and regain my focus.

I will be available to join a new organization in approximately **20-25 days**.

My Vision

My vision for the next March.2025 is to train me to become a Staff Engineer.

Thank you for considering my application and taking the time to read my message. Please feel free to reach out to me to schedule a meeting.

Warmest regards,

Sujeith Gopinath
