Work Experience

Sr. Frontend Engineer - Coboworx [Robotics for SMEs]

Tech: React + Redux Toolkit, TypeScript, Tailwind, Cypress

August.2022 – Present (Dresden, Germany)

As the individual responsible for managing the control system interface for robotics, I have been tasked with the following responsibilities:

- 40+ Quality Customers: Generated over 40 leads by successfully enabling users to create and run custom robot motions using blockly service, improving user engagement and the application's reach.
- Enhanced Control Unit Screen: Implemented efficient robot control input screen to control robot motion. This improved the customer experience, reduction in CPU load, leading to higher productivity for the company
- Managed External Frontend Team: Seamless collaboration with external teams, ensuring alignment on project goals and deliverables.
- Design System with Micro Frontend: Implemented micro frontend design system with storybook to seamlessly integrate base components across multiple platforms, resulting in efficient development processes.
- Created Component Wrapper Service: Developed a versatile component wrapper service that enables the creation of customizable components and features based on user roles and configuration settings.
- Performance Improvement: Reduced the application's load time from 5 seconds to 1.7 seconds thus improved user experience.
- Test cases: Ensured code quality by meticulously writing comprehensive Cypress test cases for both component and integration testing.
- Current Task: Currently managing the configurator platform.

SKILLS

Languages/Frontend Development

JavaScript TypeScript React

Next.js

Redux (Redux Toolkit)/Zustand

Performance (TTI, FDI, CLS, LCP)

Tailwind/Styled Components

Responsive development

HTML5/CSS3/SCSS

Testing using Jest, Cypress, RTL

StoryBook MUI/Bootstrap

Semantics & Accessibility

Angular/AngularJS

Build Tools/CI/CD/Containerization

Vite Webpack

Docker/Kubernetes

Vercel/CircleCI

Backend/Framework

Node.js/Express

EDUCATION

Bachelors Engineering: Mahatma Gandhi University (08/2008 – 04/2012)

Major in Electronics of Communication

Sr. Frontend Engineer - Loadshare Network [Logistics]

Stack: React + Redux + Hooks, Webpack, TypeScript

04/2018 – 08/2019

Managed the whole frontend logistics application, closely worked with designers, cross-team to understand and implement features

- Application Stability: Architected the platform from a legacy codebase to a Node + React + Redux SPA using TS, webpack, and test cases.
- Scalability & Performance: Implemented abstraction layer for APIs, Presentational, container components and Improved loading time.
- Deliverables: Successfully Delivered a fully functional logistics app with 13 features (audit s/m, cash on delivery, item tracking, etc)

REFERENCE: Gaurav (linkedin.com/in/g-agrawal/)

Frontend Developer - Swiggy [Food Delivery Platform]

Stack: React + Redux, Webpack, Mobile hybrid, Node

05-2016 – 04/2018

Managed the entire vendor application of Swiggy, also helped in scaling the application from 3000 to 25000 daily users

- Vendor Application: Built vendor app containing order taking, menu catalogue, discount features, multi-step signup flow, push notification
- Middleware Service: Built new APIs using Node with express by integrating with microservices services
- Diagnostic service: Introduced web worker for order polling, self-diagnostic & notification system for vendors to catch issues improving CX by 30%
- PWA Using PRPL: Successfully Developed Vendor PWA utilising PRPL pattern, ServiceWorker, IntersectionObserver and Push API
- Android Webview: Features served as android hybrid view

REFERENCE: Vinit Bothra (linkedin.com/in/vinitbothra/)

UI Developer - Pipemonk [Acquired by FreshDesk]

Stack: Angular 1, JavaScript, Bootstrap

02/2015 – 04/2016

Internal transfer from previous company and tasked to maintain website

- Cloud App: Built app with Angular 1, A/B testing + cross-device
- User Analytics: Implemented application with firebase for user analytics

REFERENCE: Vaibav (linkedin.com/in/vaibhav-sinha1989/)

UI Developer - Appiness Interactive

Stack: JavaScript, Bootstrap, D3, Mobile responsive.

9/2013 – 02/2015

Early Stage Service Based Startup.

- Schneider Electric: Built visualization chart with D3.js and dashboard
- Custom Video Player: Built flash video player used in custom ad units
- Websites for clients: Delivered responsive website from scratch
